

Project Proposal

Maggie Patton

27 April 2017

Description

For this project, I would like to work more on my first project.

Updates and Ideas:

- Add Firebase to the app, perhaps add a community page to post things
- Enable the user to take pictures through the app to add to their daily entries
- Fix the user profile page (image saving, etc.)
- Make the goals page more accessible and add the ability to track progress for each goal.

Visual Design

I plan to use a similar visual layout. I will still use a tabbed layout and list views. I plan on changing the colors and design a little bit.
